

Deadlines

from the Grants Resource Center

February 10, 2011

This publication includes deadline dates for the month of May 2011 and late announcements for the months of April 2011 and March 2011. Proposals submitted by a referenced target date will be included in a particular review cycle, while those received after the target date will be held for the next review cycle. It is advisable to contact the program staff cited in each listing to obtain all available information.

Those deadlines marked by an asterisk () are tentative. In some cases, these are specific dates that may change depending on the timing of the deadline notices and in others, we have listed just the month during which a deadline is expected. Deadlines marked by a double plus sign (++) are target dates.**

Program: Enhancing Developmental Biology Research at Undergraduate Institutions

Agency: National Institutes of Health

Next Deadline: May 13, 2011

NICHHD supports applications (R15) to strengthen the developmental biology research environment at educational institutions that provide baccalaureate or advanced degrees, but have not been major recipients of NIH support. Projects that benefit students through exposure to and participation in developmental biology research are encouraged. Also of interest are the use of novel or underutilized animal models in developmental biology research. Applicants may request up to a total of \$150,000 in direct costs. PAR expires 5/14/11. Agency: National Science Foundation

Next Deadline: May 26, 2011

Formerly the "Course, Curriculum, and Laboratory Improvement program," supports projects to improve the quality of STEM education for all undergraduate students. Especially encourages projects that have potential to bring about widespread adoption of classroom practices that embody understanding of how students learn most effectively. Transferability and dissemination are critical. Type 2 and 3 proposals were due 1/14. Type 1 proposals due 5/26 for states beginning with A-M and 5/27 for states beginning with N-W. Agency: National Science Foundation

Next Deadline: Mar 03, 2011

Supports fundamental research in engineering areas related to interfacial phenomena, mass transport phenomena, and molecular thermodynamics. Current emphasis is on molecular engineering approaches at interfaces, especially as applied to the nano-processing of soft materials. Molecules at interfaces with functional interfacial properties are of special interest and have uses in many new technologies, based on nano-fabrication. Proposal windows are 2/1-3/3 and 8/15-9/15.
